## Education

---

**MS, Engineering Management**, The George Washington University, Washington, DC *August 2023 - May 2025*  
**BS, Computer Science**, Rajasthan Technical University, India *July 2016 - July 2020*

## Experience

---

### Graduate Ambassador

*The George Washington University*

*Washington, DC*

*June 2024 - May 2025*

- Coordinated cross-functional onboarding initiatives with faculty, alumni, and students to support 200+ incoming graduates, boosting event participation by 30% and delivering 3 process improvements adopted by the department.

### Associate Product Manager

*Capgemini*

*India*

*Dec 2020 - July 2023*

- Migrated two enterprise platforms to SaaS, reducing system downtime by 40% and support costs by 20% through cross-team coordination and feature parity tracking.
- Increased sprint velocity by 15% in six months by implementing agile ceremonies, clearer prioritization, and team accountability for a 24-member group.
- Developed 10+ SaaS workflows using JavaScript and REST APIs, integrating platforms and enhanced product functionality.
- Led product strategy and roadmap delivery across 2 enterprise product lines, partnering with engineering, design, and QA to define priorities, scope MVPs, and align stakeholder expectations.
- Created and maintained documentation for 50+ product artifacts, accelerating release cycles and improving transparency across engineering and QA.

### Product Management Intern

*Bunaaai*

*India*

*Jan 2019 - Dec 2020*

- Boosted Instagram engagement by 25% through optimizing content strategy and automating customer support for 50+ daily interactions.
- Streamlined feedback loops, reducing customer query response time and increasing customer loyalty.

### Product Management Co-op

*AIESEC*

*India*

*Jan 2017 - Dec 2019*

- Redesigned national website content workflow, cutting rejection rates to under 10% across 15+ city teams.
- Trained and enabled 15+ local chapter heads to standardize editorial operations, increasing publishing consistency nationwide.

## Projects

---

### PRD Generator – Streamlit, OpenAI GPT-3.5, Python

[PRD Generator](#) 

- Built an AI-powered tool to generate editable, section-wise Product Requirement Documents (PRDs) from MRDs using LLMs and diff-based reviewers.
- Improved documentation workflow by integrating PyMuPDF/docx2txt for robust MRD parsing and a minimalist, scrollable layout that speeds review and editing.

## Skills

---

**Languages:** Python, SQL, JavaScript, REST APIs, R.

**Product & Analytics:** JIRA, Confluence, Trello, Tableau, Excel, Visio, Product Strategy, Roadmapping, Agile, Scrum, SDLC, A/B Testing, Stakeholder Management.

**Documentation:** PRDs, BRDs, User Stories, Epics, Release Notes.
